This petition makes absolutely no sense. This should be a wake up call to the free radio conglomerates to provide a better service. My family and I travel the US regularly in our RV and XM is the best possible service for us to get news, weather and traffic for our destinations. How else could I get reports about Houston while I am driving through Denver? Their local stations are not going to offer that information, but it is right at my fingertips with XM. I pay for a quality service and you should not take it away!!
